Digifort 7.3
New Features

digifort

Global Market Leader for **VMS**

- Edge Playback (Playback directly from devices like cameras with SD Card or DVRs/NVRs) for supported devices.

- Option for enforcing of strong user passwords.

- ONVIF Profile G support.

- Device Settings (Allow for changing settings of supported cameras from within the Administration Client, with support for changing multiple cameras at the same time).

- Device Events (Support for specific events of devices like Intercom button press, DVRs Video Loss and Hard disk failure).

- Object Links navigation (Navigate through objects by using overlay links on live and playback cameras).

- Object Links also allow for alarm triggers to be placed on camera images to facilitate the triggering of an alarm.

- Live PTZ camera position feedback on synoptic maps with support for Field of View.

Field of View representation for fixed cameras on synoptic maps.

▲ Escalation and ownership of alarm screens (An operator and take ownership of an alarm and escalate the alarm to other connected operators).
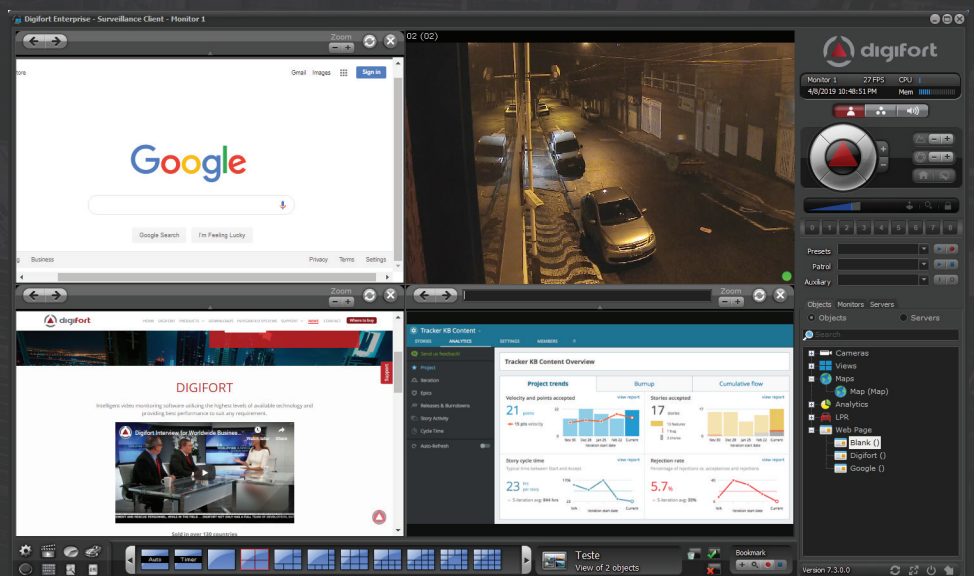

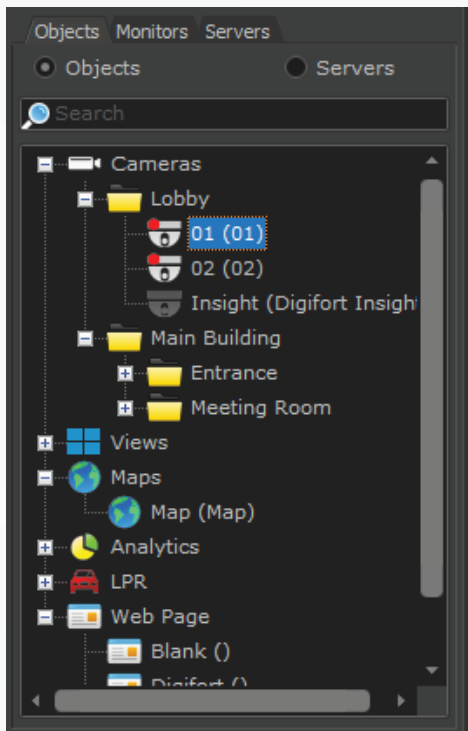

▲ Surveillance Client interface improvements.

▲ Recording encryption with AES 128 / 256

▲ Communication encryption between Server and Clients with SSL/TLS

▲ Communication encryption between Cameras and Server with SSL/TLS for supported cameras

Embedded web-client object to allow for display and navigation on web pages within the Surveillance Client. Also allow for integration with any web-based third party system.

Multi-level camera grouping.

▲ Privacy Masking with user rights (For GDPR) and improved real time Blurring algorithm.

▲ Archiving scheduling (Allow to setup a schedule for when Archiving should run).

▲ Major improvements and overhaul of LPR system.

▲ Virtual I/Os for Cameras and I/O devices.
