

OBJECT

DETECTION

Object Detection

Analytical solutions with neural network (deep learning)

Easy to configure our solution will make your solution more intelligent and bring more results and less false alarm.

 Intelligent monitoring of people, vehicles, motorcycles and objects.

 Detection of people with particular characteristics, specific color or specific objects, such as weapons

 Solutions for maintaining standards & regulations like wearing a face mask and keeping the social distance during COVID-19 Pandemic.

Crowd Detection analytic estimates the number of people within a given area in real time and triggers an alarm in digifort.

According to the World Health Organization, falls are the second leading cause of accidental or unintentional injury deaths worldwide.

Digifort's effective fall detection detects a fall and send an alarm to the appropriate authorities.

The distinct advantage of video surveillance technology for fall detection:

- First responders can visually confirm alarms remotely and instantly.
- A single person can effectively monitor hundreds or even thousands of individuals, dispatching first responders to assist only when a fall is confirmed.

Motorcycle Helmet

The helmet is the main safety equipment of motorcyclists, but many drivers do not use it.

Automatic detection of the motorcyclist without helmet from video will trigger a global alert in Digifort.

Safety Helmet

Hard-Hat detection for construction safety.

Personnel monitor whether the workers use personal protective equipment (PPE) as required for work safety.
